Studio One® Pro

Offline Activation Guide

V7.0

Offline Activation Guide

Once installed, Studio One Pro needs to be activated.

If your computer is connected to the Internet, we strongly recommend that you use the “Online Activation” process to get up and running fast using the activation process integrated into Studio One Pro. This guide will take you through the process of activating your Studio One Pro license if the machine on which it is installed does not have access to the Internet.

Please Note: You must follow the “Online Activation” process if you purchased a PreSonus Studio One Pro+ subscription license.

NOTES:

- You must have access to a computer (not a smartphone or iDevice) that has Internet connectivity to complete the Offline Activation explained in this guide.
- Before you begin, you must have Studio One Pro installed on the offline computer. We recommend you download the Studio One Pro installer from your MyPreSonus user account to ensure you get the latest update. You must have a computer that is connected to the web to download the latest update from your MyPreSonus account. Once the installer is downloaded, it can be transferred to the offline computer using a flash drive or external hard drive.

Offline Activation Instructions:

On the Offline Computer:

1. First, be sure to install Studio One Pro software onto your offline computer. You will have to download the installer from a computer that is connected to the internet. Log into your account My.PreSonus.com and register your license number to access your Studio One Pro installers. Download the correct installer for your computer’s Operating System and then transport the Installer .exe (Windows) or .dmg (Mac) via a USB Flash/Thumb Drive to your offline computer and install the software.
2. After the software has been installed onto the system hard drive, launch Studio One Pro.
3. Select the “**Studio One**” menu option, and from the drop down, select the “**Studio One Activation**” option. This will open the “Studio One Activation” menu.

- Click “Activate Offline” next.

You should now see the “Offline Activation” menu with your computer’s activation code listed.

- Copy the Activation Code in the window listed under item number 3 (or write it down on a piece of paper) as circled in the illustration above. This is the code you will enter into your MyPreSonus user account to retrieve the offline license for your computer.

This Activation Code will be a 16-digit alpha-numeric code that follows this format:

XXXX-XXXX-XXXX-XXXX

The above code is simply an example of where to look to find this code and should not be used in your activation process!

On the Online Computer:

- Log into your PreSonus User Account at: My.PreSonus.com
- Click on “My Products” in the main menu bar, then click on “Software”.
- Underneath the “STUDIO ONE PRODUCTS” section, click on the Studio One Pro product link that you have registered. If you haven’t registered Studio One Pro into your account, please do so now.
- Click the link titled “Offline Activation”.

- In the next screen, click “**Activate Software.**” In the Offline Activation menu, enter the activation code Studio One Pro generated on your offline computer in the designated field. Studio One Pro can be installed on up to five computers at once. To keep track of your activations, it is recommended that you give each computer its own name.

- Click “**Activate.**”
- Once activated, click the “**Download License**” link that is in that same area of the Software listing.

- A download will be initiated that will save the license file to the default download location on the computer. Depending on which the internet browser you use, you may be asked where you want to save the file on your computer. Browse your local folders to locate where the file was saved on your computer and copy the .license file to a USB Flash/Thumb Drive or other removable media storage device.

On the Offline Computer:

Note: This process will only work if the computer on which Studio One Pro is installed is disconnected from the Internet.

- Insert the USB Flash/Thumb Drive from Step #13 on this Offline Computer.
- Copy the .license file to your computer’s desktop.
- Launch Studio One Pro.
- Select **Studio One>Studio One Activation** option.
- Click “**Activate Offline.**”
- Drag the .license file from your computer’s desktop into the Offline Activation window. You will be alerted when your software has been successfully activated.

Congratulations, your copy of Studio One Pro is now activated!
