Windows 10 (x64) v1709 or later versions of Win 10 (x64)

New In This Release

- SL16.0.2 Firewire support added to UC Surface (which also adds Catalina support for 16.0.2 Firewire)

Fixed In This Release

UC Surface

- Metering speed and performance improvements
- Mixer control speed and performance improvements

NOTE: Metering and Mixer Control improvements require both UC Surface update and firmware update

AI Mixers

- Improved network stability
- Network settings no longer saved in Scenes to avoid networking issues
- AI Consoles: Dig Return Fader now moves independent of Tape In as expected

CS18

- Preamp mode now displays preamp levels on meters
- Group name field no longer blank on Group edit screen
- New Filter Groups now appear while on Groups bank
- Subgroup channel view no longer limited to 16 channels
- Flex Fader mute button now working for RM Mono Bus
- Panel Update message no longer shown on each bootup after firmware update
- Talkback Edit now reflects Linked Mixes
- Returning from DAW Mode no longer breaks Layer Switching
