

Universal Control 1.6.1 Release Notes (August 8, 2012)

The purpose of this update to Universal Control is to accommodate the new “Gatekeeper” feature in Mac OS X 10.8 Mountain Lion. Gatekeeper is a new security feature which allows software developers to become an Apple “identified developer”. This prevents potentially harmful software packages from being installed on your Mac. Gatekeeper checks for certification of any software package before installation and rejects any software that is from an unidentified developer. PreSonus Audio Electronics is now a proud Apple identified developer and this update to Universal Control allows our installer to be recognized as such by Gatekeeper.

The Universal Control 1.6.1 update includes drivers and control panels for the following products:

- FireStudio Mobile™ (Launch Window, Device Mixer, Driver)
- FireStudio Project™ (Launch Window, Device Mixer, Driver)
- FireStudio Tube™ (Launch Window, Device Mixer, Driver)
- FireStudio Lightpipe™ (Launch Window, Device Mixer, Driver)
- StudioLive™ 16.0.2 (Launch Window, Virtual StudioLive, Driver)
- StudioLive 16.4.2 (Launch Window, Virtual StudioLive, Driver)
- StudioLive 24.4.2 (Launch Window, Virtual StudioLive, Driver)

Note: No new features, drivers, or firmware have been added or updated for this release and no bugs have been fixed. This release is strictly to accommodate updates to Apple security in OS X 10.8 Mountain Lion.

StudioLive firmware and build information:

- 16.0.2: Firmware Version - 0.98f, build - 219
- 16.4.2: Firmware Version - 1.50a, build - 188
- 24.4.2: Firmware Version - 1.0, build - 192

Driver Version: 4.0.0.14255

Universal Control Build: 5304

Universal Control 1.6.1 Supports the following Operating Systems:

- OS X 10.7.4 (Lion)
- OS X 10.8 (Mountain Lion)

Note: This Universal Control update does not include an update for the SL Remote or QMix iOS Apps

Current App versions compatible with this Universal Control release:

- SL Remote 1.3 for iPad®
- QMix 1.1 for iPhone® and iPod Touch®

The Following iOS Devices are Compatible with SL Remote (running iOS 4 or later):

- iPad (1st generation)
- iPad (2nd generation)

- iPad (3rd generation)

The Following iOS Devices are Compatible with QMix (running iOS 4 or later):

- iPhone 3GS
- iPhone 4
- iPhone 4S
- iPod Touch 3G
- iPod Touch 4G

Universal Control Version 1.6.1 Does Not Support the Following Products or Operating Systems:

- FireStudio [26x26]
- OS X 10.6 (Snow Leopard) or earlier
- Versions of OS X 10.7 (Lion) earlier than 10.7.4

Universal Control 1.6.1 has the Following Known Issue(s):

- Scribble strip scenes do not load into the VSL scribble strip alone. In order to load scribble strip names, it is necessary to save the names as part of a complete scene. Once the saved scene is dragged from the VSL Browser onto the VSL window (not just the scribble strip), the scribble strip names will then load along with the rest of the scene.

Universal Control 1.6.1 Resolves the Following Issue(s):

- An error message in OS X 10.8 Mountain Lion when trying to install Universal Control due to the implementation of Apple's Gatekeeper security feature

Installation Instructions:

1. Quit out of Universal Control and disconnect your unit from the computer.
2. Run the installer and follow the onscreen instructions. The installer requires that your computer be rebooted upon successful completion.
3. Once your computer has restarted, connect your FireStudio- or StudioLive-series device and open Universal Control.
