- Channels Set to USB Input with Analog Digital Send Now Send Audio Through Associated AVB Send After Power-Cycle

**Quantum Family**

- Output can now be changed from within Audio MIDI Setup on Mac

**Known Issues:**

**Series III DAW Mode**

- Incorrect preamp gain range on mixer display when using TRS inputs

- Meters don't match between DAW mode and Mixer mode
- Channel parameters may not populate in Fat Channel after opening song
- Series III Automation Control: Bypass Button Not Present
- Newly added Plugin not automatically selected and controls not on FatCh Encoder section if another Plugin wasn't already selected when adding the new Plugin
- Talkback Button Does Not Light Up In UCS When Engaged From S1
- Channel Input Does Not Have Selection For "None"
- Unity Fader Value Is Not Accurate
- There Is No Way To Remove A Channel Insert
- Write Select Channel Should Turn Red Like FaderPort 8 & 16
- Pressing the Inputs layer button should open the Inputs section in S1 Console
- Adding Send while viewing Sends view doesn't update fader level
- Select Buttons For Multi-Channel Instrument Outputs Do Not Light Up
