*Offer good September 1 to September 30, 2012*

Most digital mixers are just boxes with gazintas and gazouttas. StudioLive mixers SOLVE PROBLEMS and allow you to do more because of tight software and hardware integration. What other mixer gives you the following solutions?

- Capture™ gives you the simplest 2-button multitrack recording capability with zero set up. Recording the show was never easier.
- Studio One is an amazing DAW to fully produce your recordings.
- PreSonus' wireless IOS apps (SL Remote and QMix™) are the best in the industry at ANY pricepoint (Have you checked our competitors' iPad apps recently? Some only have level control and you can't even tweak an EQ or compressor).

- Virtual StudioLive (VSL) gives you full control over your mixer with a laptop. Only PreSonus gives you built-in Rational Acoustics SMAART® integration with RTA and Spectograph. You get the world's best analysis tools free!
- Nimbit® allows you to take your recordings and sell them online in a matter of minutes

With over 50,000 units in the field and numerous free software upgrades, the StudioLive mixer is the most comprehensive yet easiest digital mixer on the planet to use.
