

Contents

Author's Preface.....	7
Chapter 1 Dynamics Basics.....	10
The Beginning of Dynamics Control.....	11
The DeciBel.....	12
Headroom in Digital Systems.....	12
The DeciBel and Dynamic Range Control.....	13
Inserting Dynamics Processors.....	13
Key Takeaways.....	15
Chapter 2 Compressor.....	18
Compressor Parameters.....	18
Input.....	19
Threshold.....	20
Ratio.....	20
Knee.....	20
Attack.....	21
Release.....	21
Auto (Attack and Release).....	21
Adaptive (Attack and Release).....	21
Output Gain and Gain Reduction Meter.....	21
Mix.....	22
Look Ahead.....	22
Stereo Link.....	23
Sidechain Section.....	23
How to Adjust the Parameters.....	23
Parameter Adjustment Tips.....	24
Compressor Presets: Friend or Foe?.....	25
Compressor Applications.....	25
Vocals.....	26
Electric Bass.....	26
Guitar (Sustainer).....	27
Guitar (Acoustic Rhythm).....	28
Kick and Snare.....	28
Cymbals.....	29
Create the “EZ Squeeze” One-Knob Compressor.....	30
The Compressor/Limiting “Delta” Test.....	33
Key Takeaways.....	34
Chapter 3 Limiter.....	38
Limiter Applications.....	39
Limiter vs. Compressor.....	39
The EZ Limiter.....	39
Gain Reduction Metering.....	40
The Complete Limiter.....	40

Input Level.....	40
Ceiling.....	40
Smoothing the Transition into Limiting.....	41
Release (Decay).....	41
Soft Clip Button.....	41
True Peak Button.....	42
Metering (and Mastering).....	43
Tech Talk: The Fletcher-Munson Curve, and Caring for Your Ears.....	44
Calibrating Your Monitors.....	45
Other K-System Options in Studio One.....	46
Parameter Adjustment Basics.....	47
Key Takeaways.....	47

Chapter 4 | Tricomp.....50

Tricomp Parameters.....	50
Compress.....	50
Low.....	51
Low Freq.....	51
High.....	51
High Freq.....	51
Speed.....	51
Autospeed.....	51
Saturation.....	51
Parameter Adjustment Tips.....	51
Key Takeaways.....	52

Chapter 5 | Expander.....54

Expander Parameters.....	54
Range.....	55
Threshold.....	55
Ratio.....	55
Attack and Release.....	55
Sidechain.....	55
Expander Applications.....	55
Reduce Low-Level Noise.....	55
Tighten a Mixed Drum Sound.....	56
Fix Overcompressed Sounds.....	57
Make Dry Electric Guitars More Dynamic.....	57
How It Works.....	57
Key Takeaways.....	60

Chapter 6 | Gate.....62

Gate Parameters.....	62
Threshold Open.....	62
Threshold Close.....	62
Range.....	63
Attack.....	63
Release.....	63

Hold.....	63
Look Ahead (LkA).....	63
Sidechain.....	63
Trigger Event.....	63
Gate Applications.....	64
Attack Delay Processor.....	64
Reduce Noise with Saturated/Distorted Audio.....	64
Drum Enhancement with Multitracked Drums.....	65
Kick Drum Replacement with Mixed Drums.....	66
Snare Drum or Tom Enhancement with Mixed Drums.....	67
Isolating the Snare.....	67
Tweaking the Mai Tai.....	69
Additional Gate Applications for Drums.....	70
Key Takeaways.....	71

Chapter 7 | Multiband Dynamics.....74

Multiband Dynamics Basics.....	74
Multiband Dynamics Controls.....	75
Diagnostic Controls and Shortcuts.....	75
Changing the Graphs' Amplitude Readout.....	75
Audio Metering Display.....	75
Color-Coding.....	76
Setting the Frequency Bands.....	76
Setting Threshold, Ratio, and Gain.....	76
Input and Output Section Lines.....	77
Dynamics Controls.....	77
Global Controls.....	77
Multiband Dynamics Applications.....	78
Fix Frequency Response Issues.....	78
Tips for Individual Instruments.....	79
Multiband Dynamics for Bass.....	79
Multiband Dynamics for Vocal De-Essing.....	81
Multiband Compressor as Graphic Equalizer.....	82
Key Takeaways.....	83

Chapter 8 | Sidechaining and De-Essing.....86

How to Access the Sidechain Input.....	86
Inserting a Send.....	87
How to Process the Signal Feeding a Sidechain Input.....	87
Internal vs. External Sidechaining.....	88
Sidechain Applications.....	89
Lock Kick Drum and Bass Together (Gate).....	89
Pump Drums with Internal Sidechaining (Compressor).....	90
Conventional Pumped Drums (Compressor).....	91
Frequency-Selective Compression (Compressor).....	92
Mutie via Ducking (Gate).....	93
Duck a Music Bed with Narration (Compressor).....	94
De-Ess with Internal Sidechaining.....	95
Reduce Amp Sim Harshness with De-Essing.....	96

Drum Sound Enhancement (Gate).....	97
Gentler Sidechain Gating (Compressor).....	98
Spectrum Meter.....	99
Key Takeaways.....	100
Chapter 9 Dynamics Control with DSP.....	102
Normalization.....	102
Normalizing Individual Tracks on Albums.....	103
Normalizing Comped Parts.....	103
Phrase-by-Phrase Normalization.....	103
Manual Limiting with Event Envelopes.....	106
Accenting Drum Dynamics.....	107
Chapter 10 Dynamics Via Automation.....	110
Automation Basics.....	110
Event Automation.....	111
Automation Nodes.....	112
Automation Methods.....	112
Method 1: Record On-Screen Control Motion.....	112
Automation Modes.....	113
Method 2: Draw and Edit Envelopes.....	114
Method 3: Record Automation Moves from a Control Surface.....	115
Automating Effect and Other Parameters.....	115
Automating Instrument Tracks.....	116
The Trim Function.....	118
Key Takeaways.....	119
Chapter 11 “Multi” Dynamics Processors.....	122
Channel Strip.....	122
Fat Channel XT.....	123
Standard Compressor.....	123
Threshold.....	124
Ratio.....	124
Gain.....	124
Attack.....	124
Release.....	124
Auto.....	125
Key Filter.....	125
Key Listen.....	125
Soft.....	125
FET Comp.....	125
Input.....	126
Output.....	126
Attack and Release.....	126
Ratio Buttons.....	126
Key Filter and Key Listen.....	126
Tube Comp.....	127
Peak Reduction.....	127

Gain.....	127
Limit/Compress Switch.....	127
Key Filter and Key Listen.....	128
Limiter.....	128
Gate/Expander.....	128
Threshold.....	129
Range.....	129
Attack.....	129
Release.....	129
Key Filter.....	129
Key Listen.....	129
Expander Button.....	129
But Wait, There's More!.....	129
How to Evaluate Compressors (So Many Compressors, So Little Time!).....	130
The Compressor Evaluation Strategy.....	131
The "Glue" Compressor FX Chain.....	131
Guitar Sustainer: Gate and Compressor.....	134
Key Takeaways.....	135
Chapter 12 "Loudness Wars" and Dynamics in Mastering.....	138
Measuring Dynamics.....	138
Can Algorithms Do the Job?.....	140
Using Dynamics in the Master Bus When Mixing.....	140
Key Takeaways.....	142
Appendix Effects Placement.....	144
Dynamics Processing and EQ.....	144
Compressor Before or After Distortion.....	144
Gate Before or After Distortion.....	144
Limiter Before or After Compressor.....	145
Limiter Before Amp Sim.....	145
Dynamics Control Before or After Envelope-Controlled Filter.....	145
About the Author.....	146
