

# More than Compressors: The Complete Guide to

# Dynamics in Studio One®

Second Edition!  
Studio One 5 info,  
more tips & tricks,  
more content!

Dynamics and Plug-In Basics

Compressor

Limiter

Tricomp

Expander

Gate

Dynamics with DSP

Multiband Dynamics

Saturation

Channel Strip

Fat Channel

Sidechaining

Dynamics Automation

Measuring Dynamics

Free Preset and FX Chain Files

...and tons of applications!

|---|-----------|
| <b>Author's Preface.....</b>                        | <b>9</b>  |
| <b>Chapter 1   Dynamics and Plug-In Basics.....</b> | <b>12</b> |
| The Beginning of Dynamics Control.....              | 13        |
| The DeciBel.....                                    | 14        |
| Headroom in Digital Systems.....                    | 14        |
| The DeciBel and Dynamic Range Control.....          | 15        |
| A Note About Dynamics Processors and Presets.....   | 15        |
| Inserting Dynamics Processor Plug-Ins.....          | 16        |
| Track (Channel) Insert Effects.....                 | 17        |
| Bus and FX Channel Effects.....                     | 19        |
| Adjusting Send and Bus Levels.....                  | 20        |
| Event (Clip) Effects.....                           | 21        |
| Master Effects.....                                 | 22        |
| Stereo vs. Mono Plug-Ins.....                       | 23        |
| Using Hardware Effects when Mixing.....             | 23        |
| Pipeline Hardware Effects Plug-In.....              | 24        |
| Limitations of External Hardware.....               | 25        |
| Key Takeaways.....                                  | 26        |
| <b>Chapter 2   Compressor.....</b>                  | <b>28</b> |
| Compressor Parameters.....                          | 28        |
| Input Gain.....                                     | 29        |
| Threshold.....                                      | 30        |
| Ratio.....  | 30        |
| Knee.....   | 30        |
| Attack.....   | 31        |
| Release.....  | 32        |
| Auto (Attack and Release).....                      | 32        |
| Adaptive (Attack and Release).....                  | 32        |
| Output Gain and Gain Reduction Meter.....           | 32        |
| Mix.....  | 32        |
| Look Ahead.....                                     | 33        |
| Stereo Link.....                                    | 34        |
| Sidechain Section.....                              | 34        |
| How to Adjust the Parameters.....                   | 34        |
| Parameter Adjustment Tips.....                      | 34        |
| Compressor Presets: Friend or Foe?.....             | 35        |
| Compressor Applications.....                        | 36        |
| Vocals.....   | 36        |
| Electric Bass.....                                  | 37        |

|   |    |
|---|----|
| Guitar (Sustainer).....                           | 38 |
| Guitar (Acoustic Rhythm).....                     | 39 |
| Kick and Snare.....                               | 40 |
| Transient Shaping with Drums and Compression..... | 41 |
| Cymbals.....                                      | 41 |
| Create the “EZ Squeeze” One-Knob Compressor.....  | 42 |
| The Compressor/Limiting “Delta” Test.....         | 46 |
| Key Takeaways.....                                | 47 |

## **Chapter 3 | Limiter<sup>2</sup>.....50**

|  |    |
|--|----|
| Limiter Applications.....  | 51 |
| Limiter vs. Compressor.....  | 51 |
| The EZ Limiter.....  | 51 |
| Limiter <sup>2</sup> Parameters.....   | 52 |
| Modes and Attacks.....   | 52 |
| Low-Frequency Performance.....   | 54 |
| Gain Reduction Metering.....   | 55 |
| The Complete Limiter.....  | 56 |
| Input Gain.....  | 56 |
| Ceiling.....   | 56 |
| Release (Decay).....   | 56 |
| Soft Clip Button.....  | 57 |
| True Peak Button.....  | 57 |
| Metering Meets Mastering.....  | 58 |
| Tech Talk: The Fletcher-Munson Curve, and Caring for Your Ears.....                  | 59 |
| Calibrating Your Monitors.....   | 60 |
| Other K-System Options in Studio One.....  | 61 |
| Parameter Adjustment Basics.....   | 62 |
| How to Use Limiter <sup>2</sup> to Hit Consistent Loudness and True Peak Levels..... | 62 |
| What Does Compressed Music Sound Like When It’s Turned Down?.....                    | 66 |
| Key Takeaways.....   | 67 |

## **Chapter 4 | Tricomp.....70**

|                                |    |
|--------------------------------|----|
| Tricomp Parameters.....        | 70 |
| Compress.....                  | 70 |
| Low.....                       | 71 |
| Low Freq.....                  | 71 |
| High.....                      | 71 |
| High Freq.....                 | 71 |
| Speed.....                     | 71 |
| Autospeed.....                 | 71 |
| Saturation.....                | 71 |
| Parameter Adjustment Tips..... | 72 |
| Tricomp Applications.....      | 72 |
| Acoustic Guitar.....           | 72 |

|  |    |
|--|----|
| Program Material “Lifter”.....                   | 73 |
| Improving “Touch” with Bass.....                 | 74 |
| Subtle Drum Dynamics Control.....                | 74 |
| Matching Song Levels in Albums with Tricomp..... | 75 |
| Leveling the Levels.....                         | 76 |
| Key Takeaways.....                               | 77 |

## **Chapter 5 | Expander.....80**

|   |    |
|---|----|
| Expander Parameters.....                    | 80 |
| Range.....                                  | 81 |
| Threshold.....                              | 81 |
| Ratio.....                                  | 81 |
| Attack and Release.....                     | 81 |
| Sidechain.....                              | 81 |
| Expander Applications.....                  | 81 |
| Reduce Low-Level Noise.....                 | 82 |
| Tighten a Mixed Drum Sound.....             | 82 |
| Fix Overcompressed Sounds.....              | 83 |
| Make Dry Electric Guitars More Dynamic..... | 84 |
| How It Works.....                           | 84 |
| How to Use Upward Expansion.....            | 87 |
| Transient Shaper FX Chain.....              | 89 |
| How It Works.....                           | 89 |
| The Macro Controls.....                     | 90 |
| The Studio One “Drumcoder”.....             | 91 |
| Drumcoding Explained.....                   | 91 |
| Vocal Effects.....                          | 94 |
| Key Takeaways.....                          | 95 |

## **Chapter 6 | Gate.....98**

|  |     |
|--|-----|
| Gate Parameters and Controls.....                | 98  |
| Threshold.....                                   | 99  |
| Reduction Range.....                             | 99  |
| Attack.....                                      | 99  |
| Release.....                                     | 100 |
| Hold.....  | 100 |
| Gain Reduction.....                              | 100 |
| Look Ahead.....                                  | 100 |
| Ducking.....                                     | 100 |
| Sidechain.....                                   | 100 |
| Trigger.....                                     | 100 |
| How to Adjust the Gate’s Parameters.....         | 101 |
| Gate Applications.....                           | 101 |
| Attack Delay Processor.....                      | 101 |
| Reduce Noise with Saturated/Distorted Audio..... | 102 |

|   |     |
|---|-----|
| Drum Enhancement with Multitracked Drums.....       | 103 |
| Kick Drum Replacement with Mixed Drums.....         | 104 |
| Snare Drum or Tom Enhancement with Mixed Drums..... | 106 |
| Isolating the Snare.....                            | 106 |
| Tweaking the Mai Tai.....                           | 109 |
| Rockin' Rhythms with Multiband Gating.....          | 110 |
| Additional Gate Applications for Drums.....         | 111 |
| Key Takeaways.....                                  | 112 |

## **Chapter 7 | Multiband Dynamics.....114**

|  |     |
|--|-----|
| Multiband Dynamics Basics.....               | 114 |
| Multiband Dynamics Controls.....             | 115 |
| Diagnostic Controls and Shortcuts.....       | 115 |
| Changing the Graphs' Amplitude Readout.....  | 116 |
| Audio Metering Display.....                  | 116 |
| Color-Coding.....                            | 116 |
| Setting the Frequency Bands.....             | 116 |
| Setting Threshold, Ratio, and Gain.....      | 117 |
| Input and Output Section Lines.....          | 117 |
| Dynamics Controls.....                       | 118 |
| Global Controls.....                         | 118 |
| Multiband Dynamics Applications.....         | 118 |
| Fix Frequency Response Issues.....           | 118 |
| Tips for Individual Instruments.....         | 119 |
| Piano.....                                   | 119 |
| Drums.....                                   | 120 |
| Bass.....                                    | 120 |
| Vocal De-Essing.....                         | 122 |
| Multiband Vocal Repair Kit.....              | 123 |
| Frequency-Selective Upward Expansion.....    | 125 |
| Dynamic EQ for EDM.....                      | 126 |
| The Setup.....                               | 127 |
| Multiband Dynamics Settings.....             | 127 |
| More Options.....                            | 129 |
| Multiband Dynamics as Graphic Equalizer..... | 130 |
| Key Takeaways.....                           | 131 |

## **Chapter 8 | Saturation.....134**

|   |     |
|---|-----|
| The State Space Input Stage.....            | 134 |
| Applying Saturation.....                    | 135 |
| Drums.....                                  | 135 |
| Bass.....                                   | 136 |
| Vocals.....                                 | 136 |
| Keyboards.....                              | 136 |
| Bus/FX Channel Send Effects Distortion..... | 136 |

|   |     |
|---|-----|
| Where to Insert Saturation.....                   | 136 |
| Mix FX.....                                       | 137 |
| Enhancing Analog Drums with the CTC-1 Mix FX..... | 137 |
| Mono Tracks with a Stereo Mix.....                | 138 |
| Tweaking the CTC-1.....                           | 139 |
| Tape Emulation.....                               | 139 |
| The Tape Emulator FX Chain.....                   | 140 |
| The Tape Emulator Control Panel.....              | 141 |
| Key Takeaways.....                                | 142 |

## **Chapter 9 | Sidechaining and De-Essing..... 144**

|  |     |
|--|-----|
| How to Access the Sidechain Input.....                   | 144 |
| Inserting a Send.....                                    | 145 |
| How to Process the Signal Feeding a Sidechain Input..... | 145 |
| Internal vs. External Sidechaining.....                  | 146 |
| Sidechain Applications.....                              | 147 |
| Lock Kick Drum and Bass Together (Gate).....             | 147 |
| Pump Drums with Internal Sidechaining (Compressor).....  | 148 |
| Conventional Pumped Drums (Compressor).....              | 149 |
| Frequency-Selective Compression (Compressor).....        | 149 |
| Muting via Ducking (Gate).....                           | 151 |
| Duck a Music Bed with Narration (Compressor).....        | 152 |
| De-Ess with Internal Sidechaining.....                   | 153 |
| Reduce Amp Sim Harshness with De-Essing.....             | 154 |
| Drum Sound Enhancement (Gate).....                       | 155 |
| Gentler Sidechain Gating (Compressor).....               | 156 |
| Spectrum Meter.....                                      | 158 |
| Key Takeaways.....                                       | 159 |

## **Chapter 10 | Dynamics Control with DSP and Event Envelopes..... 162**

|  |     |
|--|-----|
| About Envelopes.....                         | 162 |
| Event Level Envelopes.....                   | 162 |
| Event Gain Envelopes.....                    | 163 |
| Track Automation Envelopes.....              | 165 |
| Using Multiple Envelopes.....                | 165 |
| Normalization.....                           | 165 |
| Normalizing Individual Tracks on Albums..... | 166 |
| Normalizing Comped Parts.....                | 167 |
| Phrase-by-Phrase Normalization.....          | 169 |
| Manual Limiting with Event Envelopes.....    | 171 |
| Accenting Drum Dynamics.....                 | 172 |
| Key Takeaways.....                           | 173 |

## **Chapter 11 | Dynamics Via Track Automation..... 176**

|   |     |
|---|-----|
| Automation Basics.....  | 176 |
| Combining Event Level Envelopes and Track Automation.....     | 177 |
| Automation Nodes.....   | 178 |
| Automation Methods.....                                       | 179 |
| Method 1: Record On-Screen Control Motion.....                | 179 |
| Automation Modes.....   | 180 |
| Method 2: Draw and Edit Envelopes.....                        | 180 |
| Method 3: Record Automation Moves from a Control Surface..... | 181 |
| Tech Talk: Control Surfaces.....                              | 181 |
| Automating Effect and Other Parameters.....                   | 182 |
| Automating Instrument Tracks.....                             | 183 |
| The Trim Function.....  | 185 |
| Key Takeaways.....  | 185 |

## **Chapter 12 | “Multi” Dynamics Processors.....188**

|                                |     |
|--------------------------------|-----|
| Channel Strip.....             | 188 |
| Fat Channel XT.....            | 189 |
| Standard Compressor.....       | 189 |
| Threshold.....                 | 190 |
| Ratio.....                     | 190 |
| Gain.....                      | 190 |
| Attack.....                    | 190 |
| Release.....                   | 190 |
| Auto.....                      | 191 |
| Key Filter.....                | 191 |
| Key Listen.....                | 191 |
| Soft.....                      | 191 |
| FET Comp.....                  | 191 |
| Input.....                     | 192 |
| Output.....                    | 192 |
| Attack and Release.....        | 192 |
| Ratio Buttons.....             | 192 |
| Key Filter and Key Listen..... | 192 |
| Tube Comp.....                 | 193 |
| Peak Reduction.....            | 193 |
| Gain.....                      | 193 |
| Limit/Compress Switch.....     | 193 |
| Key Filter and Key Listen..... | 193 |
| Limiter.....                   | 194 |
| Gate/Expander.....             | 194 |
| Threshold.....                 | 194 |
| Range.....                     | 195 |
| Attack.....                    | 195 |
| Release.....                   | 195 |
| Key Filter.....                | 195 |
| Key Listen.....                | 195 |

|   |            |
